PROFESSIONAL EXPERIENCE

MEDORII INNOVATION

FRONTEND DEVELOPER

REMOTE, SINGAPORE

April 2023 – October 2023

- Suggested and Implemented a responsive navigation for mobile devices which led to a 30% increase in the Medorii shop visit.
- Identified remove/replaced redundant code in the Medorii main website which led to a 25% reduction in file size.
- Built and Shipped a shop feature for Medorii which helped the company display merchandise which are on sale for the customers.
- Took ownership in the development of a visually striking fashion index for Medorii's digital bears which provided further insight into the Medorii's digital products.

STUNHAUL

FRONTEND DEVELOPER

REMOTE, INDIA

2022 – March 2023

- Implemented a seller dashboard which can be used to add products and product coupons and also keep track of the different product categories and order frequency.
- Built an order summary feature where users could see their orders and shipping details and could edit and add coupons.
- Implemented an admin page where shipping details are automated and stored.
- Implemented a mobile navigation menu that assists users to navigate through the website to locate their needs.
- Streamlined the checkout process by implementing a user-friendly, step-by-step interface, resulting in a significant reduction in abandoned carts.
- Maintained comprehensive documentation for front-end components and features, facilitating smooth knowledge transfer within the team.

SKILLS

- **Technical Skills:** TypeScript, React, JavaScript (ES6), Solidity, HTML5, CSS3, Sass, Scss, Animations.
- **Libraries:** Tailwind, NextJS, Bootstrap, MaterialUI, ChartJS, ThreeJS, GSAP, Locomotive Scroll.
- **Tools:** Git, Webpack, Vite, Figma, Netlify, Vercel, Firebase.

PROJECT EXPERIENCE

- **Trakkash:** A financial tracker full-stack app built with NextJS, TypeScript, TailwindCSS, Firestore for database handling and Clerk for user authentication. It is made in a way where users can keep track of their income, expenses and balance.
- **Shapes:** An app that has three different 3d shapes, which rotates automatically and can be spun using "click and drag". This app was built with ThreeJS and React.
- **Divine Obeten:** My portfolio website built with React, React-router, CSS, Framer motion. You can find other projects I've worked on there.

EDUCATION

Alchemy University

Ethereum Developer Bootcamp

October 2023
